## EDITING RATES:

You have two options for editing depending on the style of filming/type of event.

Option 1: For limited movement or a single speaker such as a lecture your event can be 'live' mixed. This means the editing is done during the event. DVD's can be produced right after or the video can even be uploaded during the event. (\$50 hr plus setup.)

Option 2: Post production editing is used for weddings, promotional videos, movies, etc.

A basic idea how long post production editing takes - sermons, weddings, concerts are approximately 1:15 plus 5 hours for setup. That means for every 1 min of filmed footage it takes 15 mins to edit. So a 1 hour simple sermon/lecture can take 20 hours to edit. If there are Power Points, editing is about 1:20 plus 6 hours for setup. Promo or movie style videos with graphic creation, special effects, or voice overs are 1 min to 1-6 hours or more depending on how many or how complex the graphics are or how easy the script is to follow.

\$40 hr basic editing, simple graphics; \$50-100 hr for aftereffects/animations/etc. (may be outsourced)

\$100 hr for custom musical scores -- outsourced to professional musicians to ensure high quality

\$5 to 100 per song for stock music tracks (varies, can be discussed as needed.)
